

ELECTRICAL WIRING DIAGRAM for Norton 88 S.S. and 500 cc. Twin Magneto Ignition 12 volt 1964

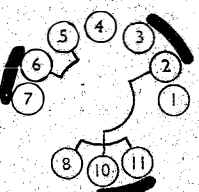

SWITCH ROTOR
POSITIONS VIEWED
FROM REAR OF
SWITCH

OFF POSITION

'L' POSITION

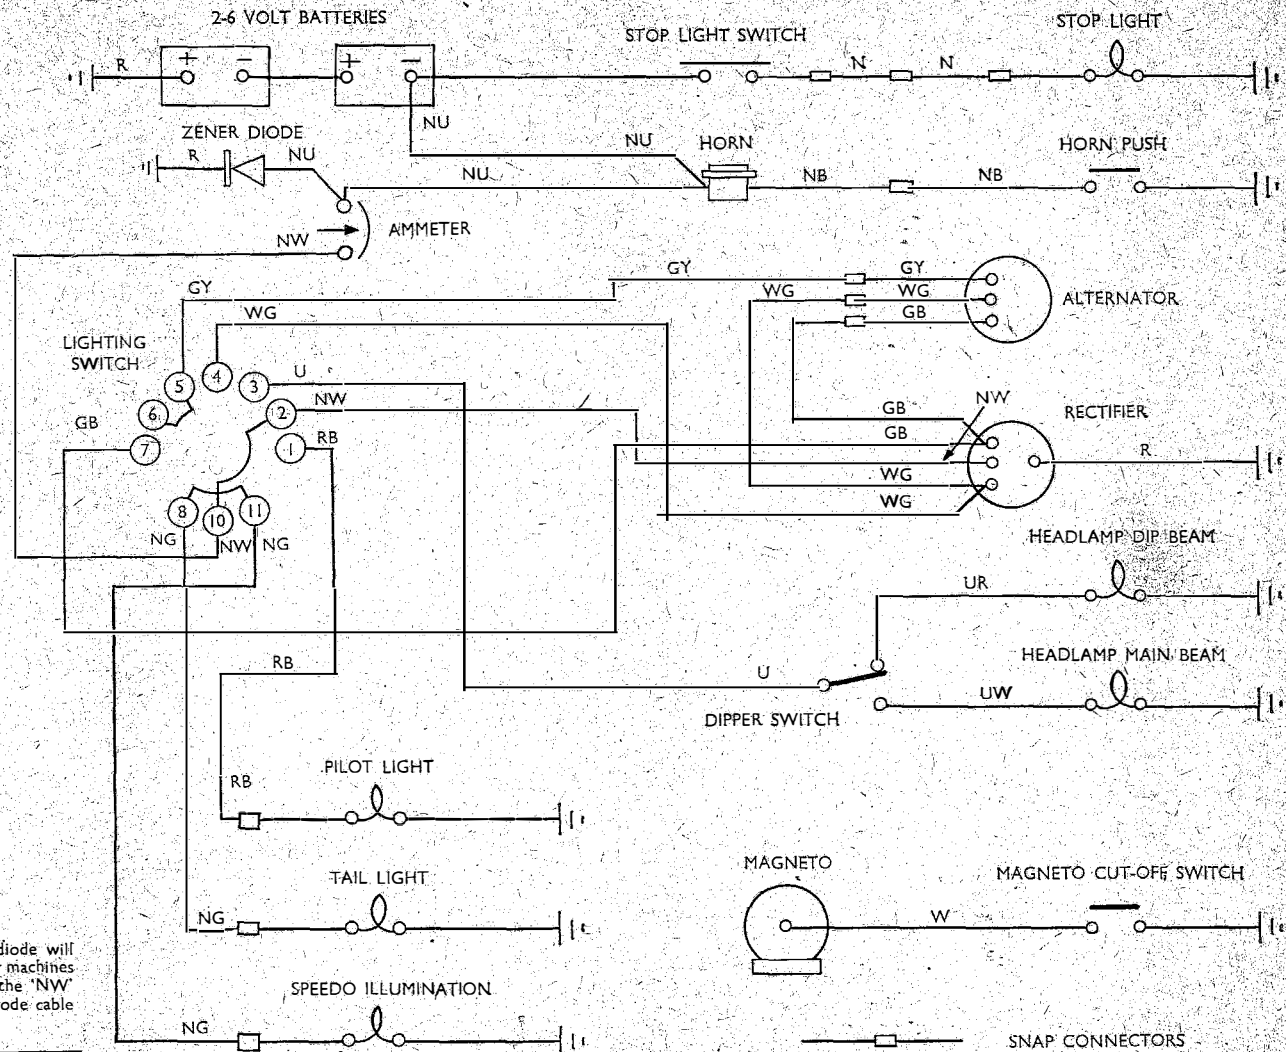

'H' POSITION

NOTE:

On earlier machines the zener diode will be connected as shown. On later machines the diode will be connected to the 'NW' terminal of the ammeter. The diode cable will then be brown/white.
